

NUKAV LED <150LM

We now offer a wide selection of orientation lighting, which includes Nukav. Nukav means 'edgy', to be taken quite literally. This is also the characteristic feature of this sleek square: it is literally missing a corner. The light is recessed a little deeper in the corner, making the oblique poly carbonate panel illuminate. The fitting can be turned in any direction for a playful effect. With a black or white structure. Designed by Couvreur & Devos.

Art. Nr. 12300032
